Ideas

Is yours an Original?

With foldables it is easy to be flexible. They are so much more than just a system to show off a poster; they are the key to building that special environment, which your company's products and services deserve. Connect them to form towers, large walls and showcases. Add top and bottom frames, use double-sided, with interior shelves or combine with glass, drapes, hooks, brochure holders, Velcro boards and more.

Why choose a Foldables

- Quick to set up and easy graphics change
- Limitless 360 degree flexibility to create different formations
- Double track frames for double-sided use
- Graphics stays protected in frame during transport and set up
