

# Maxibit, Support and Services

## Set up

### Ready to go

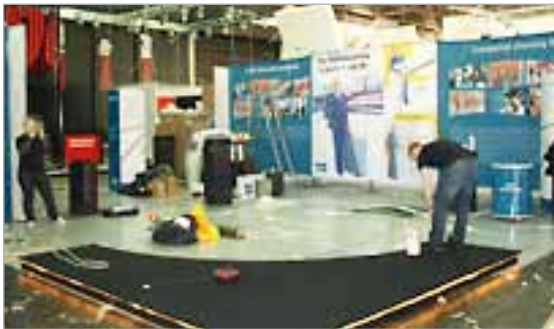

Once at the fair, Maxibit's production team can set up your display, so it's perfect when you walk into it. With this service you can relax and focus your energy to where it is needed – greeting and talking to your event visitors.

Maxibit's set up mechanics are specially trained and will realise your design everywhere you need it.

### When the event is over

After your event, the Maxibit team can pack down your display for safe keeping. Whether it is a big or small display the Maxibit mechanic will make sure you can just walk out when the event is over.

For your convenience, the Maxibit mechanic can organise transportation back to our warehouse for safe keeping and easy access for next time.

## Help during your event

### Full impact

Maxibit provides unparalleled service during your event. We can train you personnel, create rosters and schedules for staff and give advice to maximise your impact at the event and generate more leads. We can help with surveys and in-the-booth lead qualification so that you have your finger on the pulse of who has been at the event and what their potential is.

### Round the clock service

If the impossible should happen Maxibit is there to help. Maxibit provides round the clock information and help services so that any problems that arise during the fair can be fixed immediately for smoother, more professional operation.

## Demounting

### Ready to go

Once on at the fair, Maxibit's production team can set up your display, so it's perfect when you walk into it. With this service you can relax and focus your energy to where it is needed – greeting and talking to your event visitors.

Maxibit's set up mechanics are specially trained and will realise your design everywhere you need it.
