

# Stage Tension

## Be square no more

Why limit yourself to 2D-marketing? Stage Tension forms a beautiful shape for your message. It's freestanding, double sided and marks the beginning of non-rectangular portable 3D-shapes. Use a single unit at the airport or shopping mall event. Or combine several units to form completely new backdrop shapes to your booth. Both the concave and the convex side can be used as a "front side" depending on your circumstances. Stage Tension gives a fresh, playful and creative feeling to your brand.

And large as it is it still fits into the handy carrying case, even including graphics!

Stage is patented. No tools needed.

## Specifications:

### MATERIAL

Recyclable aluminium

### SIZE

Width: 1,85 m / Height: 2,5 m / Depth: 0,9 m
