## Caring for your fabric products

### Stage & Scene

The fabric prints for Maxibit Scene and Maxibit Stage are precision cut and transfer heat sublimated on 185 g “wrinkle free” Maxistretch. The material is B1 certified.

To minimize any wrinkle effect, fold your fabric neatly with horizontal folds until it has the width to fit your case (20-35 cm depending on the case). Then make the vertical folds to fit the length of your case. This technique erases most traces of the folds and your fabric will look great every time!
